👤 PROFILE

Software engineer with 5+ years of experience in developing scalable backend systems using technologies such as Python, Django rest framework, Docker, AWS Lambda, SQS, SNS, Unit Tests, Flask, C++, etc.

📁 EMPLOYMENT HISTORY

Software Engineer at Betture

March 2017 — September 2020

- Software development for small businesses and professionals
- Customer support for system maintenance and improvements

Software Engineer at RCS Partner, Brazil

February 2020 — March 2021

- Startup in the accounting area where I started working as a freelancer, and ended up working only with them for a period of time.
- We were building a big accounting system for big companies.
- Our team consisted of only 4 programmers.

Software Engineer at Olist, Brazil

April 2021 — October 2021

- I had the opportunity to work on the biggest project in terms of engineering, until then, a project in the logistics area.
- Our team took care of the heart of the company, taking care of 19 micro services written in python and DRF, being 6 API's and other services, which we called "Nano services".
- Our entire team had less than 8 programmers and we were responsible for turning business rules into code, thinking about architecture, how to fix bugs, and how to keep scaling.

Software Engineer at Boticario, Brazil

October 2021 — Present

- I work in the company's data area, and I'm the only programmer of a data team, in which I'm responsible for creating the system that integrates all data from the company's 12,000+ employees with external and internal partners.

🏆 EXTRA-CURRICULAR ACTIVITIES

Competitive Programmer at CodeForces, Brazil

June 2021 — Present

Improving my skills with data structure, algorithms, math and C++ in pursuit of becoming the best in the world in competitive programming and sharing my progress on my Tiktok channel. A true engineer is one who knows how to solve problems, not one who knows how to use tools.
